

Videk Cable Labelling Service

Videk can now offer a bespoke cable labelling service that can individualise your network. Each cable within the network can be marked with either numbering and/or lettering to ensure that cabling within your system is easily identifiable.

Different coloured cables can initially separate, for example, data and voice applications, however, with more complex networks and invariably more cabling, then a pair of cable labels is essential. Traditionally positioned at either end of the cable run, they can provide a failsafe method of ensuring that you know which cable plugged into a network switch corresponds to the appropriately marked cable going into patch panel port.

Labelling

The standard self adhesive label wrapped round the cable is 3.8cm x 2.5cm with a print area of 1.2cm x 2.5cm. We have traditionally been able to fit a maximum of 10 characters over 2 lines on this label.

Lead Time

For cables available from stock then the lead time is approximately 3 working days from placement of order.

Feel free to contact our Sales Department on 020 8200 1122 or sales@videk.co.uk for any other enquiries that you may have on this service.
